SUMMARY

Motivated and detail-oriented Full Stack Developer with experience in building scalable web applications using modern technologies. Skilled in developing RESTful APIs, integrating frontend and backend systems, and working with database-driven applications.

Proficient in authentication, CRUD operations, and API design, with a strong focus on performance and clean architecture. Passionate about writing efficient, maintainable code and continuously learning new technologies to improve development skills.

TECHNICAL SKILLS

Languages: JavaScript ,TypeScript , Python

Backend: Node.js, Express.js, REST API Development, Prisma ORM

Databases: MySQL, Database Schema Design,mongo DB

Frontend: React.js, Next.js, css, Html

Desktop Development: Electron.js

Tools: Git, GitHub, VS Code

Concepts: CRUD Operations, API Integration, Debugging & Bug Fixing, Test Case Writing, Database Modeling with Prisma

WORK EXPERIENCE

PROWERSE

October , 2025 - April , 2026

Full stack developer

- Brief: Developing backend services and REST APIs using Node.js and Express with focus on scalable architecture, database integration, and dynamic application development.
- Designed and implemented RESTful APIs including CRUD operations using SQL and Prisma ORM.
- Built and managed database models using Prisma ORM, handling relationships and efficient data queries.
- Developed dynamic modules with real-time data integration.
- Integrated backend APIs with frontend applications ensuring smooth data flow and real-time updates.
- Wrote and executed test cases to validate functionality and handled edge cases effectively.
- Identified and resolved multiple bugs, improving application performance and stability.
- Used Git and GitHub for version control, commits, and pull request workflow.

WAY TO WEB Pvt

February,2025 - August , 2025

Web developer

- Brief: Built and maintained responsive web interfaces using HTML, CSS, and JavaScript with focus on performance, usability, and clean code practices.
- Built reusable and scalable React components with Hooks (useState, useEffect) for efficient state management.
- Integrated REST APIs to display dynamic data and handled loading and error states.
- Followed best practices for clean code, Git version control, and collaborated with designers and backend developers.

PROJECTS

Task management system

- Developed full-stack task management system using Node.js, Express.js and MySQL.
- Built RESTful APIs for users, tasks, documents, notifications, dashboard and chat features.
- Implemented input validation and JWT authentication for secure login and protected routes.
- Designed database schema and implemented CRUD operations with raw SQL queries and query helpers.
- Developed People Page, Documents/Receipts module and Profile Setup flow.
- Wrote test cases and fixed multiple bugs

Social media

- Built Social Media module using Node.js and Express.js.
- Developed RESTful APIs for posts, likes , comments and follow/unfollow.
- Implemented relationships and real-time updates using MySQL queries.
- Implemented JWT authentication for secure user access.
- Performed testing and debugging for smooth user interactions

Smart hospitality hub

- Designed and developed a hotel room booking and event management web application.
- Built responsive and interactive user interfaces using React.js and Tailwind CSS.
- Structured backend data models using MongoDB for booking history and event listings.

EDUCATION

B.Tech in information and communication technology
Ganpat university

2022-2025
